Revenue & Stat. Abstract & Atlas for 1913-14.

I have already submitted a preliminary note on this subject, which is before the Dewan.

As personally directed by the Dewan yesterday, I have put up for approval a draft of an order requiring me to take up the revision of the Atlas and requesting Dept. Heads & Depts. to readily comply with all requisitions from me for info. relating to their Distts. & Departments.

A clerical Establishment consisting of 2 clerks, a typist and a draughtsman may be required for this work. As this office (Rev. Secy.) when I consulted, considers that he cannot conveniently spare them from his offg., it will be necessary to sanction this Establishment as a cost of Rs. 200 p.m. temporarily for 3 months. A draft order will be put up accordingly, if approved.

Secretary's Views

The file relating to the question of the establishment to be allowed for Mr KR Srinivasiengar has been forwarded to the Financial Secretary for opinion —

If the question of establishment is to be decided in the Council the present Note may also be considered in Council & the questions raised discussed & decided.

I WORK TO BE DONE BY THE OFFICER

(1) To study the Statistical Abstracts of British India, the United Kingdom, the United States of America and similar available publications of other countries with a view to determine the heads of information to be embodied in the proposed Statistical Atlas of Mysore and also to decide on the form of statements, graphs and charts to be adopted.

(2) To study the official returns of each Department for obtaining materials for the numerous statements to be prepared and for the purpose of suggesting improvements as to the form and contents of the returns submitted by the Departments, in cases where they appear to be defective.

(3) To study all available special publications such as Census Reports, Mr. V.S. Sambasiva Iyer's Report on the Industrial Survey of Mysore, Mr. Chatterton's Bulletins on Trade Statistics of Mysore, the bulletins issued by the Agricultural Committee of the Economic Conference &c. with the object of embodying in the Atlas useful items of information contained in them.

(4) To study the Dewans' addresses to the Representative Assembly and the annual Administration Reports of the State with a view to note the progress of the administration of the State in each Department since the Rendition and give a brief account of it in the Atlas.

(5) To obtain further information from Heads of Departments, where necessary, if the particulars available in the published reports and returns referred to above are found incomplete or insufficient.

(6) After the materials are gathered and the necessary statements are prepared, to write out the body of the Statistical ~~Abstract~~ Atlas, arranging the materials properly under suitable headings, giving a short account of each Department, furnishing all available statistics of interest and importance in respect of each Department and indicating any noteworthy inferences these statistics might suggest.

P.T.O.

II WORK TO BE DONE BY THE CLERICAL STAFF

(1) To compile the statements, which may be prescribed by the officer, from the Departmental returns and reports and other available sources of information.

(2) To help the officer, when required, in studying published reports &c. and taking notes.

(3) To prepare drafts of communications to other officers for approval, make fair copies and attend to miscellaneous office work.

(4) To do all clerical work in connection with the preparation of the abstract.

The draughtsman will prepare graphs and charts on all points indicated by the officer for purposes of graphical illustration.

P.T.O.

III TIME REQUIRED FOR THE WORK

Some progress has been already made under items (1), (2), (3) of Part I (Work to be done by the officer). I have gone through the Statistical Abstracts of Madras and Bombay, the Financial and Commercial Statistics of British India and the similar compilations of the United Kingdom and the United States of America. The completion of all the items of work specified in (I) may take about two months more. During these two months the establishment will be employed on the preparation of the statements in the forms which I shall draw up and give them to be filled up from the sources to be indicated by me. As the information required for each statement has to be gathered from various scattered sources, it may be readily imagined what an amount of labour the preparation of the statements must necessarily involve. The statements relating to population alone have been occupying one of the two clerks placed for duty under me for the past ten days while the other clerk has been employed on the preparation of fair copies of drafts and the typing work in connection with the preparation of the list of leading men in Mysore. It

is because of the laborious nature and magnitude of this work that I consider an adequate clerical establishment to be very necessary if the work is to be proceeded with rapidly. I have at present asked for four hands besides a draughtsman. Even this establishment may, I fear, prove insufficient for making rapid progress with the work. But for the present I shall content myself with this number and shall ask for more later on if I find absolute necessity for it.

If the collection of the materials and the preparation of the statements are completed within two months, the wrting of the work may then be taken up, which I think may occupy about a month, so that in about three months' time from the date the full establishment asked for by me is sanctioned, I expect to have the first draft of the Statistical Atlas ready; and I hope to be able to submit the draft in a final form for approval in a month thereafter, i. e., by the middle of December next, assuming that the establishment will be sanctioned at once and that I am allowed to devote my whole time and attention to this work.
